

Why Buy STIHL Saw Chain

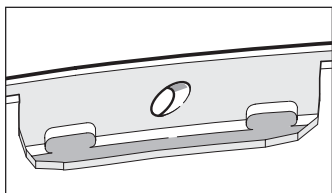

STIHL is the only chain saw manufacturer on the planet to design and produce its own saw chains. After all, the number one selling brand of chain saw in the world deserves a chain that matches its quality and dependability. Through advanced engineering and technological innovations, each and every STIHL OILOMATIC® chain is created for performance – they are literally cutting edge. When the bar meets the bark, trust the only chains good enough to carry the STIHL name.

Ematic™ Bar Lubrication System

When used with STIHL OILOMATIC® saw chain, it will provide optimal lubrication, longer wear and less oil consumption than conventional methods.

Two ramps, strategically placed in the guide bar rail, help contain the flow of oil and direct all lubrication to where it is needed. The Ematic™ system can reduce bar oil consumption up to 50%.

Ematic™ S Feature

A new angled oil delivery hole for the STIHL ROLLOMATIC® E Super Guide Bars in the longer lengths of 28" to 41" is designed to improve oil flow to the saw chain.

Pre-stretched Chain

All STIHL OILOMATIC® saw chain is pre-stretched before leaving the factory. This helps eliminate excessive chain stretching during break-in period, and reduces maintenance time and component wear.

Chamfered Rivet Holes

- Special machining process ensures smooth rivet holes with no microscopic cracks
- Reduces friction and stretching

OILOMATIC® Drive Links

- OILOMATIC® channel funnels oil directly to rivets reducing friction and wear
- Reduces volume of bar oil needed

Chromed Cutters

- Sharpened before assembly
- Stay sharp longer with less filing
- Filing angle indicator mark on depth gauge
- Wear indicator on cutters

Hardened Rivets

- Enable rivets to withstand high loads
